

**For Immediate Release: 1 May 2015**

**INTERTEK NOTIFICATION OF MISLABELED ETL LISTED VERICOM CAT 5E TYPE CABLES**

Intertek Testing Services (ETL) notifies consumers, retailers and distributors that Vericom Cat 5E cables have been inadvertently labelled as “ETL Listed” for safety by the manufacturer. The proper labelling should have been “ETL Verified” for cable performance.

All known affected cables do carry a UL and c(UL) safety certification clearly marked on the cable jacket.

The incorrectly marked cables are easily distinguishable as missing an ETL Control Number immediately following the “ETL Listed” marking on the cable jacket, as shown on the example below.

ETL Listed cables would include the ETL control number and be marked “ETL Listed 4002107” or “ETL Listed 4000889”.

**Name of Product: Vericom**  
**Type: Cat 5E Cables**
